

# How to Incorporate Progress Bars into Surveys

**Progress bars rely on html formatting and can serve as a visual aid to show study participants their survey progress**

**Please note: Estimated survey completion values (i.e. 50% Complete) are determined by project editor and are not automatically calculated features of REDCap!**

Click Edit Instruments, select instrument, click Add Field where you would like the progress bar positioned, and select **Descriptive Text (with optional Image/Video/Audio/File Attachment)** under Field Type.

### Add New Field ✕

You may add a new project field to this data collection instrument by completing the fields below and clicking the Save button at the bottom. When you add a new field, it will be added to the form on this page. For an overview of the different field types available, you may view the 🎥 [Field Types video \(4 min\)](#).

**Field Type:** Descriptive Text (with optional Image/Video/Au ▼ 

**Field Label** [How to use Piping](#)

**Variable Name** (utilized during data export)

ONLY letters, numbers, and underscores  Enable auto naming of variable based upon its Field Label?

Optional file attachment, image, audio, or video:

 **Embed an external video** (provide video URL) [?](#)

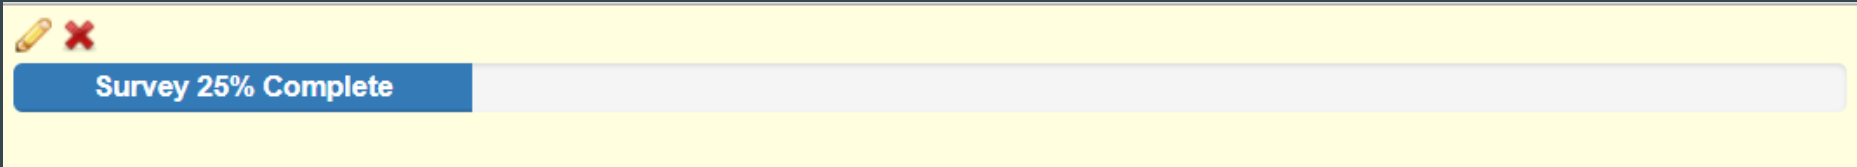

e.g. <https://youtube.com/watch?v=E1cCuVMupzD>,  
<https://vimeo.com/62730281>, <http://example.com/movie.mp4>

Display format of video:  Inline  Inside popup

**Action Tags / Field Annotation** (optional)

 [Learn about Action Tags](#) or [using Field Annotation](#)

To generate a simple progress bar at 25% completion, paste the following html text in Field Label box and Save: `<div class="progress"><div class="progress-bar progress-bar" role="progressbar" style="width: 25%" aria-valuenow="75" aria-valuemin="0" aria-valuemax="100" >Survey 25% Complete </div>`

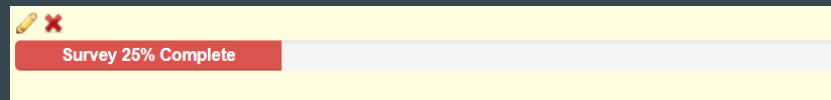

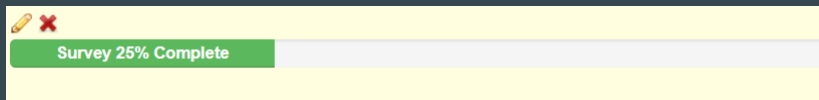

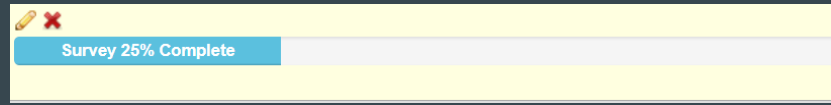

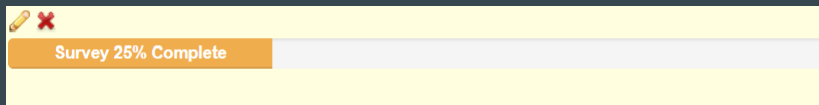

To edit **bar width** or **bar text**, simply edit text in red below:

```
<div class="progress"><div class="progress-bar progress-bar" role="progressbar" style="width: 25%" aria-valuenow="75" aria-valuemin="0" aria-valuemax="100" >Survey 75% Complete </div>
```

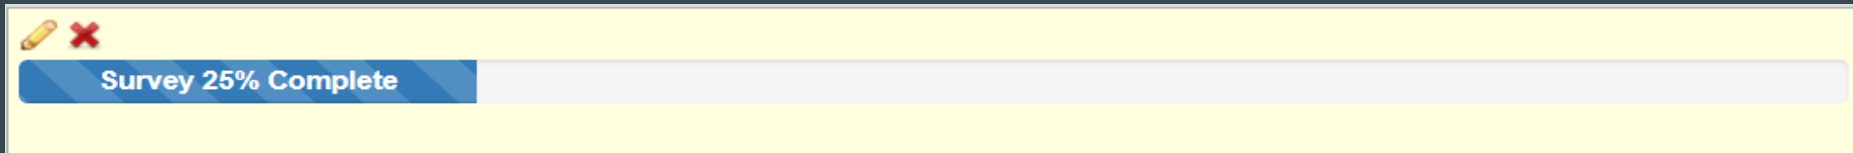

To change the bar color from BLUE to orange(**warning**), green(**success**), light blue(**info**) or red(**danger**), replace **Insert Here** with red text located to the right of desired color:

```
<div class="progress"><div class="progress-bar progress-bar-INSERT HERE" role="progressbar" style="width: 25%" aria-valuenow="75" aria-valuemin="0" aria-valuemax="100" >Survey 25% Complete </div>
```

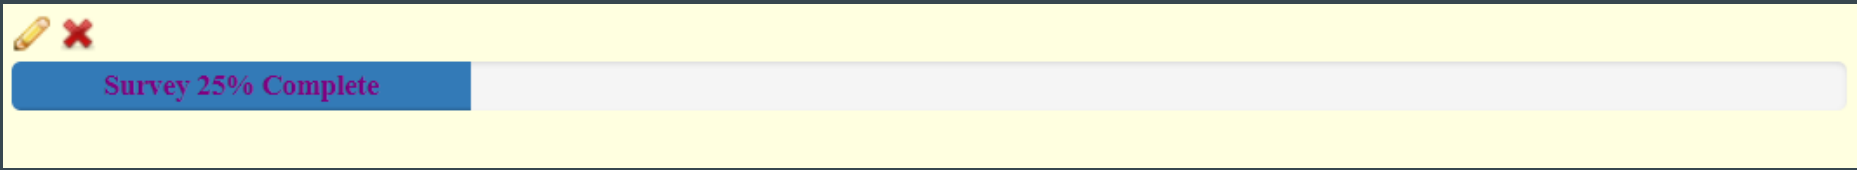

To add a stripe to the bar insert **striped**. To produce stripe movement add **active** (stripe movement not shown on slide): 

```
<div class="progress"><div class="progress-bar progress-bar-striped active" role="progressbar" style="width: 25%" aria-valuenow="75" aria-valuemin="0" aria-valuemax="100" >Survey 25% Complete </div>
```

To edit **bar text** or **text color**, insert and edit text in red:

```
<div class="progress"><div class="progress-bar progress-bar" role="progressbar" style="width: 25%" aria-  
valuenow="75" aria-valuemin="0" aria-valuemax="100" > <font face = comic sans ms color = purple> Survey 25%  
Complete </font> </div>
```

\*It is possible to add additional enhancements to progress bars. All users are welcome to explore variations in html formatting to customize a project to their desire.
